

# Going Green!

Countryside Holidays Near the Sea

## Our Environmental Statement

Here at Whitehill Country Park we are very conscious of looking after our environment. We have been recognised for this by attaining the Gold Award for the David Bellamy Conservation Scheme and working towards the Green Tourism Award Scheme. We are very proud that we contribute to the Greener Environment.

## Tips for a Greener Environment

- Recycle your waste where possible. We have bins located throughout the park for cans, bottles and newspaper. You'll see the recycle points at various points around the parks.
- Resist feeding wildlife, particularly seagulls that can become a nuisance.
- Turn off all appliances in rooms that are not being used.
- Please don't leave the television on 'standby' when not in use and instead turn off at the wall.
- Save on water, please don't leave a tap running unnecessarily. Only fill the kettle with the amount of water you require.
- When cooking leave a lid on your pan!
- Please don't leave the fridge door open for longer than necessary or put food in the fridge whilst still hot.
- There's a good public transport from the park instead of using your car or you may walk to certain areas. This is not only good for you but also our planet!
- Do you really need that extra carrier bag when buying items from the shops? Why not reuse the same bag?
- Only leave your footprints in the sand and don't allow your carbon footprint to get out of hand!

You may like to take some of these suggestions home with you to help conserve our planet, save you money and improve your lifestyle!
